

SIMULTANEOUS STARTER 230V/400V UP TO FOUR MACHINES

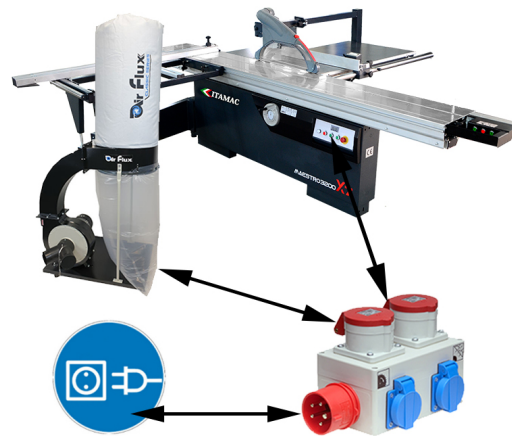

€400,00 (excl. VAT)

Works with all machines up to 7.5 KW. Connect several machines so that they can be started up together. Use this simultaneous starter when combining a woodworking machine and dust extractor. The starter motor ensures that your dust extraction system starts up automatically four seconds after you start up your woodworking machine yourself. After stopping your woodworking machine, extraction is also stopped a few seconds later. These extra few seconds of suction ensure that your pipes are always clean.
