SLOTTING MACHINE RA17VG FOR WINDOWS AND DOORS

€427,37 (excl. VAT)

Specially designed for grooving doors and windows. Thanks to this milling cutter it is possible to insulate without disassembling your joints. Place rubbers or other seals to insulate your window or doors efficiently. Equipped with two soles (flat and v-shape 90°). Thanks to these guides, this router runs perfectly over flat surfaces or the inside of a straight corner joint. Includes additional side guide (for both left and right use) for better stability on flat surfaces. Perfect for installing Virutex rubber or PVC seals.

Supplied as standard in a handy PVC case with underneath a cutter and hose + connectors for dust extraction.

SKU: VIR-RA17VG
