

SPINDLE MOULDER TT100/4

€1 .983,47 (excl. VAT)

High-quality and powerful spindle moulder, suitable for use in every workshop. The machine is adjustable to four speeds (with electronic display) and has a 230V motor that delivers 3HP. As a result, this spindle moulder can handle a wide range of applications. Work comfortably and precisely on multiple materials or hard and soft woods. Suitable for standard milling work, milling pins, rebating or profiling at higher speeds. Because of its low speed of 1800 rpm, this machine is also suitable for sanding work. The higher speeds, on the other hand, are excellent for milling profiles. With the help of our accessories, cutters and adaptors, the possibilities of the TT100/4 spindle moulder are endless. Easy changeover between right or left rotation for optimum adaptation to any workpiece.
