

SURFACE ROUTER FR277R

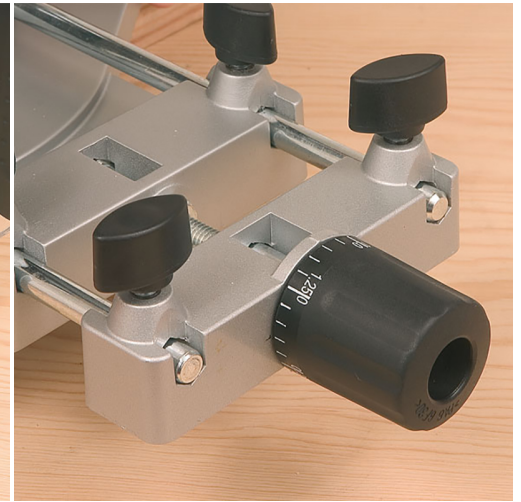

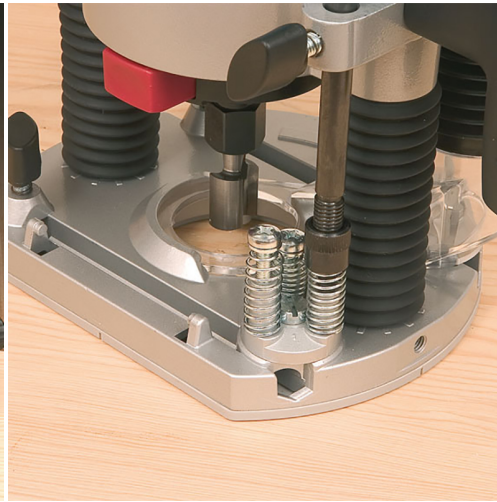

€333,88 (excl. VAT)

Lightweight router from Virutex for milling wood or plastics. Thanks to its light weight, this router is very manageable and suitable for most milling and copying work. The FR277R delivers high precision and stability while working. Ideal for deburring edges, copying, milling frames, etc. The milling depth is adjustable between 0-50mm and is easily adjusted using three fixed positions. The lateral conductor, in turn, is equipped with a micrometric control to work precisely at all times. Easy to set using a rotary knob. Equipped with a connection for dust extraction.
