

T MULTI GUIDE PMT111

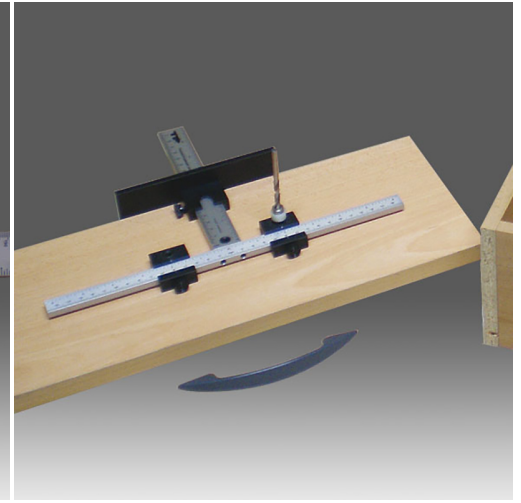

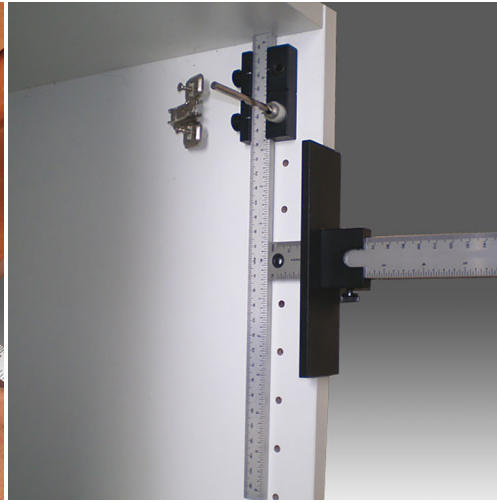

€147,37 (excl. VAT)

This multifunctional position guide easily replaces all other guides or moulds. The T multi guide is an indispensable tool for making furniture, cabinets,... The high-precision drill guide allows you to carry out all drillings with a distance of 32mm (or more) correctly. Use this guide for: handles on doors and slides, holes for shelves, hinges or drawer guides. As an option, you can also use an extension piece to drill longer driving holes with a distance of 32mm. These extensions are available separately per set of two.

The guide has a central borehole and two adjustable boreholes in hardened steel. The basic length for this guide is 320mm. This can be extended up to 810mm with the optional extensions. Standard delivery with a Ø5mm drill bit.
