

THICKNESSER TT41DMS

€3 .875,00 (excl. VAT)

Robust thicknessing table in a heavy cast iron frame. This thicknessing machine is easily adjustable by means of a smoothly rotating, steplessly spinning wheel. Equipped with a millimetre scale so you can easily read off the correct height. During work, the thicknessing unit remains in position without any problems thanks to the locking device. Combined with the heavy duty planer shaft (with four blades) and powerful engine (5.5 HP), this ensures a smooth, even finish on all your workpieces. The thicknesser is equipped with two rollers, to ensure the smooth feeding of your workpiece at all times. These two rollers are driven separately by a second motor. The machine can be easily opened at the top to replace the blades. Maximum width 410mm.

With connection for dust extraction.
