

THICKNESSER TT53DMS

€9 .900,00 (excl. VAT)

Robust thicknessing table in a heavy cast iron frame. This thicknesser is easily adjustable in height. For this purpose, the machine is equipped with a separate motor and dial with digital readout. Equipped with a millimetre scale so you can easily read off the correct height. In combination with the heavy planer shaft (with four blades) and powerful engine (7.5 HP), this ensures a smooth, correct and even finish on all your workpieces. The thicknesser is equipped with two rollers, to ensure the smooth feeding of your workpiece at all times. These two rollers are separately driven by a third motor. The machine can be easily opened at the top to replace the blades. Maximum width 530mm.

With connection for dust extraction.

SKU: REVA53DMS5

GALERIJAFBEELDINGEN

Robust thicknessing table in a heavy cast iron frame. This thicknesser is easily adjustable in height. For this purpose, the machine is equipped with a separate motor and dial with digital readout. Equipped with a millimetre scale so you can easily read off the correct height. During work, the thicknessing unit remains in position without any problems thanks to the locking device. Combined with the heavy duty planer shaft (with four blades) and powerful engine (7.5 HP), this ensures a smooth, even finish on all your workpieces. The thicknesser is equipped with two rollers, to ensure the smooth feeding of your workpiece at all times. These two rollers are separately driven by a third motor. The machine can be easily opened at the top to replace the blades. Maximum width 530mm.

With connection for dust extraction.

PRODUCT INFORMATION

- Thicknesser
 - Heavy cast iron frame
 - Two table rollers
- Automatic lifting with digital meter
 - Motor for planing shaft
 - Motor for lifting
 - Motor for wood feed
- Heavy duty planer shaft with 4 blades
 - Exhaust 160mm
 - Easy to change blades
 - Robust transmission unit
