TILTABLE MITRE SAW TS33W

€1 .042,58 (excl. VAT)

Portable, tiltable mitre saw with precision laser on the saw blade for high precision cutting. Standard equipped with a Ø300mm saw blade and 48 teeth in high quality carbide. Cutting capacity up to 160x95mm or 200x45mm. Thanks to its robust design and weight, this mitre saw is ideally suited for use on the site. The machine is both rotatable and tiltable between 0° and 45°. With ergonomically designed handle suitable for both left and right-handers.

A set of clamps to clamp the workpiece is available as an option. Use it, for example, for cutting aluminium.

SKU: VIR-TS33W

GALERIJAFBEELDINGEN

Identical to model TM33W but without upper table. Portable, tiltable mitre saw with precision laser on the saw blade for high precision cutting. The laser starts automatically with the saw blade. Standard equipped with a Ø300mm saw blade and 48 teeth in high quality carbide. Cutting capacity up to 160x95mm or 200x45mm. Thanks to its robust design and weight, this mitre saw is ideally suited for use on the site. With ergonomically designed handle suitable for both left and right-handers. Thanks to the precisely rotating base with a clear marking of the main grades, you can cut mitre cuts up to 45° quickly and easily. In addition, the machine can also be tilted between 0° and 45° to chamfer with great precision.

The gas spring, the soft start of the engine and the double-toothed belt transmission guarantee a high level of comfort while working. This in turn translates into improved precision and a better quality end product. In terms of safety, the TS33W is equipped with a patented brake on the saw blade. This brake ensures that the blade comes to a complete stop within seconds of the machine being switched off. The machine is also equipped with a protection against unintentional start-up and an additional saw blade protection.

A set of clamps to clamp the workpiece is available as an option. Use it, for example, for cutting aluminium.

PRODUCT INFORMATION

- Tiltable mitre saw
- Rotatable and tiltable 0°-45°
- Precision laser on the saw blade
- Easily adjustable
- Ergonomically designed handle

ADDITIONAL INFORMATION

Weight	18 kg
Input Power	1500W
Diameter sawblade	300mm
No-load speed	3700rpm
Cut 0° x 0°	160x95mm
Cut 0° x 0° with option 3346388	200x45mm
Cut 0° x 45°	110x95mm
Cut 45° x 0°	160x64mm
Cut 45° x 45°	75x64mm
