

TRIMMER FR192VG

€291,83 (excl. VAT)

Lightweight trimmer with a powerful motor, suitable for a wide range of applications. Can be used for straight or round grooving, profiling on wood or laminate and milling out small templates (e.g. for placing hinges). The machine can be converted into a small router without additional accessories.

Standard delivery with a combined tungsten carbide bevel cutter. Equipped with a transparent hood for dust extraction. In addition to the electronic speed control, the FR192VG has a control system that maintains the speed. In this way, a constant speed is always guaranteed, regardless of the effort of the machine.

SKU: VIR-FR192VG

GALERIJAFBEELDINGEN

Lightweight trimmer with a powerful motor, suitable for a wide range of applications. Thanks to its comfortable operation and high efficiency, this trimmer delivers excellent quality. Suitable for profiling on wood as well as on all types of laminate. The FR192VG trimmer is also ideal for milling out small templates with great precision. For example, quickly and easily make recesses to fit hinges using the special Virutex templates. Finally, you can also easily mill round or straight grooves using the standard delivered accessories.

Precise and simple height adjustment by means of a rotary knob. The machine can be converted into a small router without additional accessories. Standard delivery with a combined tungsten carbide bevel cutter. Thanks

to the powerful motor, you can optionally also do rabbeting work on your windows or doors. Equipped with a transparent hood for dust extraction. In addition to the electronic speed control, the FR192VG has a control system that maintains the speed. In this way, a constant speed is always guaranteed, regardless of the effort of the machine.
