

TRIMMER FR256N SET

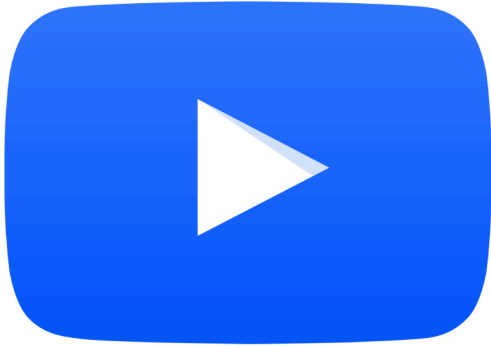

€384,56 (excl. VAT)

This trimmer is identical to the trimmer FR156N, but the trimming head CA56U is included as standard in this set. The CA56U trimming allows to trim all the edges of the panel continuously in one pass. The trimming head has a large support surface for perfect stability on flat surfaces. The extra handle provides a better grip and increased comfort while working. The CA56U head is also an indispensable accessory for trimming corners. Using the supplied pen, you can easily create a support to place the machine horizontally. Thanks to this lever, you can easily trim vertically to also finish your corners beautifully. (see video)

SKU: VIR-FR256N

GALERIJAFBEELDINGEN

Radius trimmer, for trimming edges of PVC and veneer. Suitable for materials with a thickness between 2mm and 3mm. Using the right bits the machine can also process thicker material. Thanks to this machine you can trim the four sides of a panel in one passage, both for chamfering and rounding. Ideal for the manufacture of kitchen furniture or others containing the same type of edge. Standard delivery with a router bit in high-quality carbide and radius 2 for making round edges. Including collet Ø8mm. Unique to this type of trimmer from Virutex is the height control. Adjust the height of your machine with unparalleled precision thanks to the lever and the rotary mechanism.

Motor equipped with electronic speed control. Using the automatic brake on the ball bearing, you avoid damaging edges or panels. Included in this set is the trimming head CA56U. The CA56U trimming allows to trim all the edges of the panel continuously in one pass. The trimming head has a large support surface for perfect stability on flat surfaces.
