

WINDOW FRAME SAWING MACHINE RV70U

€958,35 (excl. VAT)

Virutex's RV70U window frame sawing machine has been developed specifically for sawing wooden frames and for use in restorations. The machine makes slots in wood, but also in other building materials, making it easier to replace window frames. This sawing machine comes standard with a carbide saw blade with 30 teeth and a diamond saw blade to make slots in harder materials. Combined with the strongest motor of its kind (1700W), this sawing machine allows you to replace window frames neatly in any situation and without any problems. By reversing the base of the machine it is also possible to make slots in corners. Max depth of cut 68mm.

SKU: VIR-RV70U

GALERIJAFBEELDINGEN

Virutex's RV70U window frame sawing machine has been developed specifically for sawing wooden frames and for use in restorations. The machine makes slots in wood, but also in other building materials, making it easier to replace window frames. The machine is equipped with a special saw blade with 30 tungsten carbide teeth and an adjustable front guide. This guide also serves as a support while working. This sawing machine comes standard with a carbide saw blade with 30 teeth and a diamond saw blade to make slots in harder materials.

Combined with the strongest motor of its kind (1700W), this sawing machine allows you to replace window frames neatly in any situation and without any problems.
