

## KREG SELF-ADJUSTING ROD CLAMPS

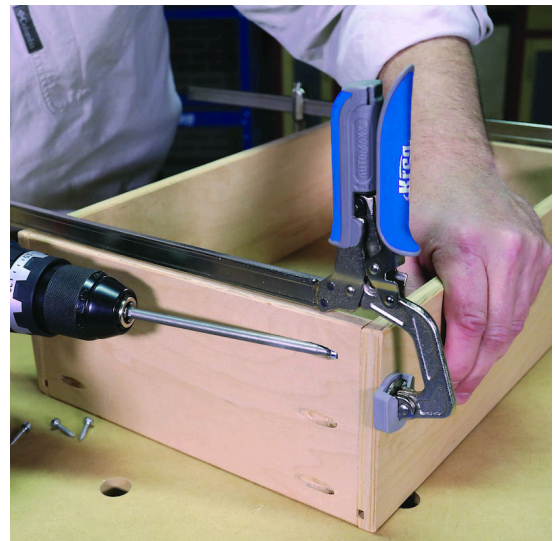

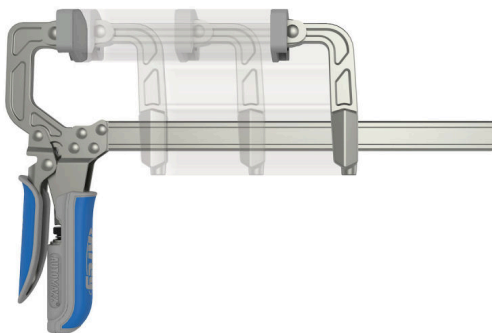

**€39,99 (HT)**

The self-adjusting bar clamps with Automaxx® technology are an indispensable tool. The clamps automatically adapt to the materials. Handy if you use materials of different sizes. Simply slide the clamping jaw against the workpiece and press the handle in. The clamping pressure is easily regulated with a rotary knob, from soft to extremely strong. The self-adjusting rod clamps are available in three lengths, 200, 400 and 600 mm, so you can choose the right length for your project. Whether you need to secure large pieces during assembly, secure workpieces to your workbench or do other jobs, the self-adjusting rod clamps do it for you.

**UGS : N / A**

### GALERIJAFBEELDINGEN

Do you want the durability and convenience of Automaxx® self-adjusting clamps, but need more clamping capacity? Then the self-adjusting rod clamps with Automaxx® technology are the solution. Like other Kreg® clamps, these rod clamps automatically adjust each time you use materials of different sizes. Simply slide the clamping jaw against the workpiece and press the handle in. Automaxx® technology does the rest, closing the clamp time after time with predictable, reliable clamping pressure. The clamping pressure is easily regulated with a rotary knob, from soft to extremely strong. The self-adjusting rod clamps are available in three lengths, 200, 400 and 600 mm, so you can choose the right length for your project. Whether you need to secure large pieces during assembly, secure workpieces to your workbench or do other jobs, the self-adjusting rod clamps do it for you.
